*Songwriter's Note:* To build and move through the sequence of verses gradually, sing each line twice, then change the verse when adding the next voice. Start with the first voice on the top line; after the repeat, change to verse 2 and add the second voice on the top line at the second entrance. Then add successive voices in sequence down the page, replacing each bracketed phrase with the next verse as voices are added:

1. deep and wide
  2. wide and strong
  3. strong and sweet
  4. sweet and fresh
  5. fresh and deep
- (optional: repeat from 1)
